ORIGINAL DISSECTIONS

OF THE

FRUCTIFICATION OF BRITISH PLANTS;

Chiefly executed for the late EARL OF BUTE, by MILLER.

And on the same day will be published, uniform with the above; price 2s. 6d.

NUMBER I.

OF

AN INTRODUCTION

TO

THE SCIENCE OF BOTANY.

By ROBERT JOHN THORNTON, M.D.

LECTURER ON BOTANY AT GUY'S HOSPITAL; AUTHOR OF A NEW ILLUSTRATION OF THE SEXUAL SYSTEM OF LINNÆUS, THE PHILOSOPHY OF MEDICINE, &c. &c.

“That existence is surely contemptible, which regards only the gratification of instinctive wants, and the preservation of a body made to perish. Superior to the brute beasts, man is made to contemplate the *great Book of Nature*, and behold with wonder and adoration the stupendous works of Him who created both these and us.” LINNÆUS.

LONDON, PRINTED FOR JAMES WALLIS, 46, PATERNOSTER-ROW; AND THOMAS COX, BOROUGH; AND SOLD BY ALL BOOKSELLERS, STATIONERS, &c. IN THE UNITED KINGDOM.

PROSPECTUS.

THE science of Botany is so agreeable and ornamental an acquisition, that it has of late been pursued *con amore* by all classes of people. To facilitate this general wish, the author has availed himself (with permission of the family) of the very accurate dissections of the fructification of the several British Plants which were accomplished for the late EARL OF BUTE, by MILLER, at a very considerable expence, and now makes its first appearance before the public. The arrangement is new, and agreeable to the latest improvements made in the LINNÆAN SYSTEM, whereby this science is rendered level to the meanest comprehension. NEW TABLES are likewise formed to facilitate yet more the easy acquirement of this lovely science; and THE INTRODUCTION to this work is so illustrated by Plates, that it may be said now to be rendered a study so easily obtained, that the complaint of its difficulty, it is hoped, will for ever cease. The present form of works on ENGLISH PLANTS, designed for Students and Ladies, has been hitherto *unattempted*, and it is hoped, will be a sufficient excuse for adding this to the many works already existing on this particular branch of the Science.

CONDITIONS.

- I. That this Work will be completed in One Hundred Numbers, containing upwards of 550 Plates, and will form Six elegant Volumes Royal Octavo.
- II. That each Number shall contain Six Plates, accurately coloured after nature, with correspondent descriptions in Letter-Press, upon a Fine Wove Extra-Royal Paper; printed by T. BENSLEY, and Hotpressed, at Two Shillings and Sixpence per Number.
- III. That the same not coloured shall be at Two Shillings per Number.
- IV. That One Number of Introduction, and another on the British Plants, shall be published the last Day of every Month until the Work shall be completed.
- V. That in the course of this Work shall be given the Heads of RAY, the EARL OF BUTE, SMITH, WITHERING, and the other authors on British Plants.
